

Troll Castle

The Trolls have stolen magic stones from your friend the Good Wizard. You must go inside the Troll's castle and bring the magic stones back. If the Trolls see you, they will try blocking the way out. There is one magic exit you might find (Trolls can block that exit too).

This is a cooperative game. Players work together to help the boy return all of the magic stones and then escape the Troll's castle safely.

To Play:

Cut out the 16 small gamecards. Place the 16 small cards face down around the table that you are sitting at. Now cover each small card with a speech card from your Speech Sound Kit. Its important to place these cards face up. Now you are ready to play!

Your child can start by naming one of the cards that are on the table. Make sure that he takes his time and is careful to make his new speech sound correctly. To get more practice, have him say the word two or three times. After correctly producing the sound in the word he chooses, your child can then take the card away and look at the small card found underneath. If the card found is a magic stone, that player can place it on the scene on a stand next to the Good Wizard. If a player finds a Troll, place him over one of the exits in the castle. If the magic exit is found, put it in its place on the gameboard on the dotted line marked on the castle wall (Trolls can block magic exits too!).

Take turns. When you choose a card have your child say the word once using his new sound correctly before you turn it over. If at any time all of the available exits are covered and you have still not collected all seven of the magic stones, you lose the game.

*small game cards
hidden underneath
speech cards*

16 speech cards face up

Return all of the magic stones to the Good Wizard before the Trolls block all of the exits and you win the game!

cut out these game cards. hide under your cards for speech (see game instructions)
